

## **BRADLEY J. KILEY**

Mr. Kiley has over thirty years of professional experience working in Washington, DC. An established leader in operational management for progressive causes, Kiley played key operational leadership roles for the 1996 Democratic National Convention in Chicago, as well as for the Democratic National Committee during much of the 1990s. Kiley was appointed Deputy Assistant to the President for Management and Administration at the White House during the second term of the Clinton Administration and was instrumental to the early and successful growth of the Center for American Progress, a think tank in Washington, DC.

Kiley's experience and strong management skills were recognized when he was asked to help lead the incoming transition team for then President-elect Barack Obama in 2008. It was during the presidential transition that Kiley was asked by the incoming President to join his Administration as the Assistant to the President for Management and Administration at the White House, where he served from January 20, 2009 to January 20, 2013.

As the Assistant to the President for Management and Administration, Kiley was in charge of overseeing all day-to-day operations of the White House, including finance and budget, facilities management, information technology, human resources, security, management oversight of the Executive Residence, and oversight of the Office of Administration, which provides enterprise services to all eleven components of the Executive Office of the President.

Following his service during the first term of the Obama Administration, Kiley served as Chief Operating Officer for the Elizabeth Glaser Pediatric AIDS Foundation where he managed the end-to-end finances, human resources, and field operations for the \$200 million organization. for January 2013 to 2020. Kiley currently serves as Chief Operating Officer for Radio Free Asia.

A proud graduate of Texas Christian University (TCU), Kiley resides with his husband and life partner, Jamie Coley, in Chevy Chase, MD.
